The Team

MRK[®]
only the best is good enough

About us

We have been on the market since 2010, but the experience of the management team is over 15 years in this field.

We have specialized staff, with a solid professional training, experienced and motivated by the achievements and existing perspectives.

We are a young team, generating constructive ideas, in constant interaction and we aim to fully satisfy customer requirements, through quality services provided for their benefit. This is possible thanks to the qualification, ambition and orientation towards NEW of our team of specialists, as well as the negotiation practices oriented towards customer satisfaction. We care about your needs and we want to help you turn your house into a Home.

We offer seriousness and attention to every product that comes out on our doorstep, "turnkey" projects in a complete package of services and specialized advice in choosing the optimal solution for each entity.

From the very beginning, MRK has chosen to work with top suppliers worldwide, able to ensure both quality and innovative and diversified solutions.

A quality product means quality materials.

Ornamental panels department

The first impression is always the most important.

The front door is an important element of a home, bringing value to your home. Her choice must be made carefully and must focus on design, quality and security. It reflects your style and personality.

MRK offers you the possibility to customize your door panels in various ways, starting from the colors and filling, and ending with the type and shape of the glass that is included in its composition.

The panel can be made out of HPL, ALUMINUM and ABS, having different types of fillings, and can be made in different thicknesses. Standard packages are between 24 and 52mm, but depending on demand, they can also be made at atypical thicknesses.

Ornamental panels are resistant to mechanical shocks, moisture, provide rigidity and increased thermal insulation and at the same time a pleasant appearance, suitable for any style of building.

Glass department

The manufacturing process of the thermal insulating glass is carried out in a fully automated technological flow with computerized assistance of the entire production. The assortment of glass in stock increased at the beginning of 2019 with several types of glass to offer customers the opportunity to find the type of glass they want. In order to obtain a high quality final product, in addition to the well-trained staff, the section was equipped with high-performance equipment, as well as using high quality raw materials.

Wrapping department

With over 10 years of experience in the field of PVC and Aluminum profile wrapping
and with the know-how received from our suppliers, we have come to understand
and satisfy all customer requirements.

State-of-the-art technology together with high quality adhesives and foils allow us
to offer our customers a wide range of RAL shades, as well as imitations of wood
essences or metallic finishes .

Therefore, MRK is not limited to the classic white and comes to the aid of architects
and builders with a range of over 60 shades.

PVC joinery production department

MRK is one of the manufacturers in this field where human resources are mainly used
in the area of details and installation of accessories.

We are among the few manufacturers that work exclusively according to the product
catalog, closely following the quality indicators, the optimal processing method, the
reinforcement systems, the closing

We access perfection: **„ONLY THE BEST IS GOOD ENOUGH!”**

ABS Panels

Milling panels with glass and buried
aluminum ornament

2024 - 2025

ABS (Acrylonitrile butadiene styrene) is a polystyrene compound, and the plates made of this material are distinguished by very good thermoforming behavior, increased impact resistance and high rigidity.

Our range of ABS plates is available in a variety of colors and finishes, and plates with special treatments for resistance to environmental factors, fire behavior and noise reduction are also manufactured.

The main properties of ABS boards:

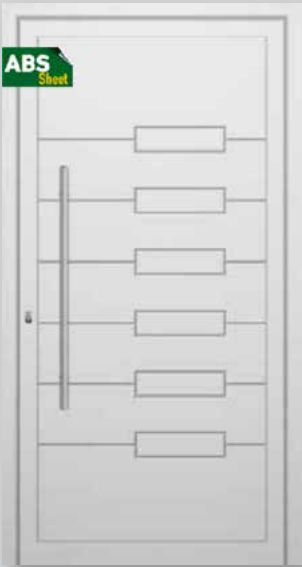

- Good impact resistance even at low temperatures
- Thermal resistance
- High rigidity
- Easy processing
- Low shrinkage and very good dimensional stability

ABS is suitable in applications where high distortion temperature (95-125° C) and high hardness are required. It also has a very good mechanical resistance to low temperatures, thus becoming the ideal material for our products that have to withstand a wide temperature range.

Special Panels

Bevel Collection

2024 - 2025

"The front door is the business card of every home."

With an elegant, harmoniously integrated design, the door can be customized for you down to the smallest detail. Special panels are an important accessory because they give you a special design for your door and your home.

The special panel model can be customized by you by choosing the model, color, thickness, glass and optional accessories.

ABS or HPL plate

Panel exterior wall thickness: 1.5mm

The filling is made of extruded polystyrene (XPS) secured with 0.4mm sheet and laminated plywood with thickness: 24mm
– 52mm Thermal insulation glass: 2-3 glasses, in different combinations

White or colored matt glass, painted, fused or stained glass
color: UNI or WRAPPED according to the color palette.

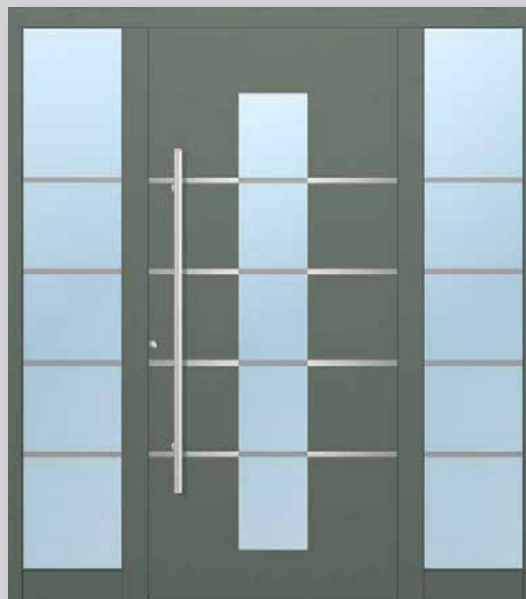

All these models can be executed on foiled aluminum as well as on any other RAL color.

Resin Glass

The production of stained glass is based on a system that uses a wide range of high quality pigmented resins, keeping their color over time. The resins are applied to the glass by a CNC machine simulating lead grids from a classic stained glass window. It can be colored later to create a detailed decorative glass. Although the contour is executed by an automatic machine, the color is applied manually by our artists, giving each work a unique look.

The benefits of MRK ornamental panels

**Protection**

ABS/HPL and aluminum panels have high resistance to impact, humidity, atmospheric changes, mold, corrosion and the action of UV rays.

**Sound insulation**

Due to the constructive elements used in the design of ornamental panels, they have superior sound insulation properties.

**Thermal insulation**

The ornamental panels have extruded polystyrene foam, which gives them superior thermal insulation.

**Security**

The surface of the panels offers increased resistance to shocks, bending and tearing due to high quality raw materials.

**Increased Comfort**

The superior sound insulation properties of the ornamental glass used increase the degree of intimacy and, implicitly, the comfort of the home.

**Increased Value**

The special glass is used for the special design, giving a note of modernity and superior elegance to the rooms.
